Description

I wanted to build an easy, practical and versatile platform for developers and new developers. You will have the advantage of being able to instantly download the programs required for Shaiya Development with an application and not having to deal with infected sites and fake and fraudulent people.For new developers, you will be able to access information about Shaiya and Development through an application.You will also have more access with the game management panel that I will integrate into the application in the next update.If you encounter any problems, errors, or have any suggestions, do not forget to contact me via FeedBack!

For those who have just started the software and those who want to open a shaiya server and improve themselves, many files and programs will be needed in this process. Viruses, fake files, danger of encountering scammers, etc. They may encounter things. In this process, the Shaiya Developer Packet application will help you a lot. It will provide you with all kinds of files and information necessary for you in a single program. What you need to do is to use the content that is useful for you from within the application.

Targets

1. **Supporting new developers**
2. **Providing comfort to all kinds of users**
3. **Avoid wasting time**
